

AXEL ANDERSON

axel@ftml.net | github.com/axelav

Skills

High-quality web application development using modern tooling (React/Redux, Flask)
Modular, scalable, testable, and reusable code
10+ years experience building polished and performant apps

Work

Director of Product / Software Engineer
Pillar Technologies
January 2018 – March 2022

Built web apps with React/Redux, APIs with Flask, and a cross-platform native app with React Native. Led engineering/product team and liaised with business and customer success teams. Deployed microservices to ingest third-party API data. Managed deployments and infrastructure with Kubernetes. Projects included a realtime messaging service with WebSockets, time series data visualization and reporting tools with D3, and job site floor plan maps with Leaflet.

Software Engineer
The Daily Beast
December 2016 – January 2018

Built web apps with React/Redux, APIs with Node.js/Express, and Serverless microservices to handle millions of requests per day. Our team's main objective was to replace an aging SaaS publishing system with a modern, collaborative tool for the newsroom.

Software Engineer
Eyeview
July 2015 – December 2016

Built web apps with Angular.js and APIs with Grails. Spearheaded E2E testing project using Protractor.

Frontend Engineer
Propellr
August 2013 – July 2015

Built web apps with Angular.js and data visualization tools using D3.

Frontend Engineer
Buddy Media / Salesforce
March 2011 – July 2013

Built internal platform and client websites using Backbone.js and jQuery.

Web Developer
Xylem Digital
October 2009 – August 2010

Developed websites using Backbone, Drupal, jQuery, and Wordpress.

Product Manager / Editor
Flavorpill
April 2007 – September 2009

Worked with editorial and product teams to launch and build new digital publications. As an Editor, wrote and edited for weekly events and arts publications.

Education

Bachelors of Arts, English
University of Florida
July 2001 – April 2006
